CAREER OBJECTIVE

AI & ML engineering student with practical experience in Generative AI, LLM evaluation, prompt engineering, RAG, NLP, and cloud-based data engineering. Skilled in building end-to-end AI applications, ETL pipelines, and AWS data solutions using Python and FastAPI. Seeking opportunities in AI/ML Engineering, GenAI, LLM Applications, NLP, or Data Engineering.

EDUCATION

Bachelor of Technology - CSE With AIML Specialization Sanjivani University, Kopargaon	CGPA: 8.5/10	2024 - 2027
Diploma in Computer Technology Sanjivani K.B.P Polytechnic, Kopargaon	Percentage: 84.51%	2021 - 2024
SSC - Maharashtra Board S.G.Vidyalaya, Kopargaon	Percentage: 83.40%	2020 - 2021

TECHNICAL SKILLS

Programming Languages: Python, SQL, JavaScript, Java, C++

AI / GenAI: Generative AI, Prompt Engineering, RAG, Agentic AI, NLP, Computer Vision, Deep Learning, LLM Evaluation

Frameworks & Libraries: FastAPI, Flask, PySpark, Pandas, NumPy, TensorFlow/Keras, OpenCV, YOLOv8, Scikit-learn

Web Technologies: HTML5, CSS3, JavaScript, REST APIs

Databases, Tools & Technologies: Amazon Redshift, MySQL, MongoDB, SQLite, ChromaDB, AWS S3, Apache Airflow, dbt, Docker, Git, GitHub, Ollama, Power BI, ETL Pipelines, Data Warehousing, Star Schema Design

PROJECTS

End-to-End Cloud Data Warehouse on AWS | Github: [Repository](#)

- Designed and implemented an end-to-end cloud data warehouse for e-commerce analytics, integrating customer, order, product, payment, and shipping data from multiple sources into Amazon Redshift using a Star Schema data model.
- Built automated ETL pipelines using Python, Pandas, and PySpark for data ingestion, cleansing, transformation, and validation; implemented a Data Quality Framework with completeness, accuracy, uniqueness, and referential integrity checks.
- Applied advanced data engineering concepts including SCD Type-2 for historical records, CDC pipelines, incremental loading using MERGE operations, and dbt-based transformation models.
- Orchestrated full workflow with Apache Airflow and built a FastAPI + React analytics dashboard delivering business insights on revenue trends, customer behavior, product performance, and regional sales.
- Technologies Used:** AWS S3, Amazon Redshift, Python, Pandas, PySpark, SQL, Apache Airflow, Docker

Safeision – Real-Time Smart CCTV Threat Detection System | Github: [Repository](#)

- Built a real-time surveillance system with zone-based monitoring, masked individual detection, 6-class weapon recognition, and an automated WhatsApp alert escalation pipeline with image and GPS evidence on trigger.
- Designed and shipped the complete system end-to-end – YOLOv8 model to Flask API to browser-based UI – as a fully deployable AI application.
- Technologies Used:** Python, OpenCV, YOLOv8, Flask, JavaScript

AI-Powered Candidate Screening & Interview System (RAG-Based) | Github: [Repository](#)

- Built a full-stack AI-powered interview platform that generates role-specific technical questions dynamically using candidate resumes, Retrieval-Augmented Generation (RAG), and role-based knowledge bases.
- Developed a complete RAG pipeline with PDF ingestion, semantic chunking, sentence-transformer embeddings, ChromaDB vector search, and context-grounded question generation using Ollama.
- Implemented resume parsing, adaptive interview flow, automated answer evaluation, feedback generation, and performance reporting with MongoDB-based session management.
- Technologies Used:** Python, FastAPI, React.js, Tailwind CSS, MongoDB, ChromaDB, Ollama, Qwen, Sentence Transformers, RAG, NLP

LLM Reasoning Evaluation Engine (ReasonEval) | Github: [Repository](#)

- Designed a post-training evaluation framework to assess multi-step reasoning quality in LLM outputs using structured rubrics for logical consistency, completeness, and instruction adherence.
- Built a FastAPI-backed scoring pipeline that ingests model outputs, runs rubric-based evaluation, and surfaces failure patterns including hallucinations – modular and compatible with multiple LLM backends (Ollama, API-based).
- **Technologies Used:** Python, FastAPI, Pandas, LLM APIs, Ollama

Multilingual Translator & Summariser | Github: [Repository](#)

- Engineered a full-stack NLP and Document AI application supporting 58 languages with PDF/DOCX translation, tone detection, pronunciation coaching, and cultural context notes – shipped end-to-end with zero cloud-API dependency.
- Implemented TF-IDF extractive summarisation from scratch achieving 71% word reduction; built a 3-stage Hinglish detection pipeline using Devanagari Unicode detection, a custom 50-word Hindi lexicon, and langdetect.
- **Technologies Used:** Python, FastAPI, NLTK, PyMuPDF, gTTS, SQLite, JavaScript

INTERNSHIPS

LLM Post-Training Intern - Ethara AI (Gurugram)

Jan 2026 - May 2026

- Evaluated LLM-generated responses using structured rubrics, assessing output accuracy, reasoning quality, and instruction-following to support RLHF and SFT alignment workflows.
- Identified hallucination risks and reasoning gaps in model outputs even when final answers were correct, contributing structured failure-pattern logs that improved downstream evaluation benchmarks.
- Delivered prompt evaluation, response validation, and image comparison tasks across multiple client AI projects, maintaining strict quality and productivity benchmarks throughout.

AI & Cloud Intern – IBM SkillsBuild via Edunet & AICTE

Jul 2025 – Aug 2025

- Developed AI-Based Research Assistant Agent on IBM Watsonx, capable of summarizing papers, drafting sections.
- Utilized Agentic AI, IBM IAM Auth, Python, Google & Wikipedia search for deployment.

Web Development Intern – Techking Solution, Shirdi

Jul 2023 – Aug 2023

- Built live Currency Converter website with real-time API integration
- Led UI/UX and deployment with team collaboration

COPYRIGHT & INTELLECTUAL PROPERTY

Nyay-AI: AI Based Legal Document Analysis and Guidance System

- Certificate No. SW-2026022947 | Application No. SW-45302/2025-CO | ROC: 29/05/2026 | Copyright Office, Government of India
- Co-author: Vansh Nilesh Badjate & Vaishnavi Nitin Nikumbh.

CERTIFICATION

| • IBM Watson Studio | Issued by IBM Career Education Program |
| • Introducing Generative AI with AWS | Udacity |

CO-CURRICULAR ACTIVITY

- Gold Medal – AI Innovation Expo 2026, IBM / CareerTiQ (Project: SafeVision – Real-Time Threat Detection System)
- Grand Finalist (Top 25 of 60 teams) – Kumbha Visitor Experience Innovation Challenge 2026
- National Hackathon – SUNHACKS 2025, Sandip University, Nashik
- State-Level Competition – Dipex 2025, selected to idea presentation round
- Vice President – AIML Department Student Association (ADSA), Sanjivani University (2024–2025)

DECLARATION

I hereby declare that the information provided above is true and correct to the best of my knowledge. I am confident that if given an opportunity, I will deliver my best and contribute positively to the growth of your organization.
